The Sensational Seven Writing Tips

Sierra Cartwright

Writing, more than anything is a craft, part art, part skill. And easy reading is difficult work! Think of a cabinet maker. She could easily put a piece of plywood at the back of the cabinet. After all, no one sees it. But a craftsman knows the structural integrity will be compromised if she shortcuts the time or the materials. A true craftsman measures twice, cuts once. And she creates a product that is not only gorgeous but also functional. Writing is easy. Being a craftsman is the real challenge.

- 1 Commit to Writing One Million Words
- 2 Read. Read, Read, Read!
- 3 Understand Goal, Motivation, and Conflict
- 4 Use Deep Point of View (POV)
- 5 Master Scene and Sequel
- 6 Know Your Tropes
- 7 Avoid Common Pitfalls

Remember the most important thing: You can't revise a blank page.
